## MODERN EDUCATORS SONS OF CAROLINA

Many Graduates of University Are Prominent in Educational Work.

### SCATTERED OVER THE COUNTRY

College Presidents, Professors, and Men in All Branches of Education Received Their Training at Carolina.

The graduates of Carolina have distinguished themselves in the field of education as well as in all other walks of life. The University can boast of having prepared some of the most prominent educators of today. It is

DR. CHARLES ELIOT

our purpose to give a short sketch of some of the most prominent of these educators since their graduation.

Samuel Reynolds Pritchard graduated with the A. B. degree in 1885, A. M. in 1890. He was a member of the Euphradian Society. He taught Greek in 1886, and was later made instructor in mathematics. In 1890 he resigned and accepted the assistant professorship in mathematics at Wofford College. From 1893-1898 he was professor of physics and electrical engineering at Virginia A. and M. College. In 1898 he was elected professor of electrical engineering at Virginia Polytechnic Institute, which position he now holds.

John Sherwood McLucas took the A. B. degree in 1893. He was instructor in mathematics, 1893-1894. Mr. McLucas then went to Harvard University and graduated with the A. B. degree in 1895. He was assistant professor of English at Clemson College, 1896-1905. In 1899 he went back to Harvard for his A. M. degree. He is now a professor in Carnegie Institute.

Edward Caleb Coker was a member of the Euphradian Society. He left the Junior Class in 1893. He went to the University of Virginia, where he graduated in 1897, taking the A. B. degree. He was principal of St. David's Academy, Darlington, 1894-1896. From here he went to Marion to be the superintendent of city schools, 1897-1901. He was superintendent of the schools of Greenwood, 1901-1906.

## RENOWNED BARRISTER CAROLINA GRADUATES

Her Statesmen and Jurists Have Been Loyal to Their Alma Mater.

### LAW GRADUATES RANK HIGH

The University Has Reason To Be Proud of Their Wisdom and Justice.—An Honor to Her.

The catalogue of alumni, since the reopening of the college in 1880, contains the names of many distinguished lawyers and barristers. Some few, born Carolinians, have left their mother State at the call of a wider mission, while others have come to us from sister States and served as true citizens. The records of a few of Carolina's graduates in the Department of Law are given below:

Major John Hardin Marion was born in Sumter County in 1874 and

PRESIDENT MITCHELL.

graduated from the South Carolina College at the age of nineteen with the degree of Bachelor of Arts and Bachelor of Laws. He was a member of the Clariosophic Society and belonged to the Phi Kappa Psi fraternity while in College. In '93 he was admitted to the bar by special act, and for four years was county attorney. He served in the Spanish-American War with the First Regiment, South Carolina Volunteers; and after the war was elected at the head of the Chester delegation to the House of Representatives. In 1900 he was elected major, Third Battalion, First Regiment, South Carolina Volunteers, Infantry. He is now general counsel for the Carolina and Northwestern Railroad.

John Joseph McMahan is a native of Fairfield County. He graduated at the South Carolina College with B. A. and M. A. degrees, and later began to practice law in Columbia. He was a member of the Constitutional convention in 1895, and served as presidential elector in 1896.

Francis Hopkins Weston was born in Richland County in '66, and was

## ENDOWMENT FUND AIDING STUDENTS

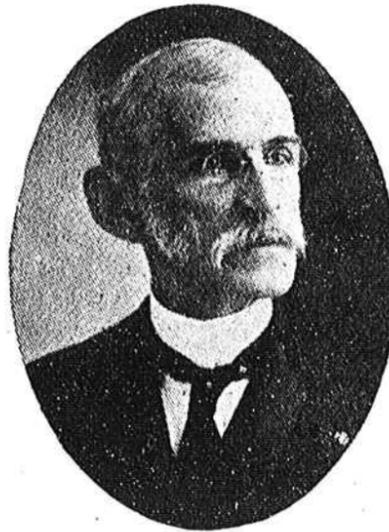

The Fund Has Done Much Good Since 1904.

### STUDENTS HELPED THROUGH

More than One Hundred Men Have Been Enabled to Receive an Education. Fund Constantly Increasing.

At the centennial celebration of the South Carolina College held in Charleston in 1901, a plan was proposed by prominent alumni present to provide for an endowment fund. Prompt steps were taken to carry out the idea and by the subscriptions of loyal alumni of the old college and new university about seven thousand dollars are now in the hands of the trustees and the amount is continually increasing.

The college had never had an endowment fund of any kind up to that time. The Allston, Hampton, Legare and other scholarship funds existed in name only; the principal had been swallowed up in the days of Reconstruction and the scholarships now carry free tuition for merit only, in honor of the men who endowed them. As a fitting memorial to mark the Centennial of the College it was proposed to raise a sum of money the interest of which was to be used in assisting

MAJOR BENJAMIN SLOAN.

deserving students in the expenses of their college course. The original suggestion came from Dr. Frank F. Simpson, '89, now a physician in Pittsburg, but Prof. A. C. Moore and Mr. August Kohn took a prominent part in the organization that followed. Mr. E. G. Siebels has subscribed liberally to the fund and is now in charge of its management.

The plan in brief is as follows: There are a great many deserving young men in the State who cannot raise more than half the amount of money necessary for his expenses in college. The interest from the endowment fund is loaned to these men

## ENGINEER GRADUATES IN FRONT RANK

Architects and Engineers Who Have Made Good.

### HOLD RESPONSIBLE POSITIONS

Carolina Men Have Made Good in All the Various Branches of the Great Engineering Profession.

The Department of Engineering and Mathematics has produced many men who have risen to the top notch in their profession. Although, in electrical engineering, the University offers little more than a purely theoretical course, the careers of the graduates in this branch reflect honor on their instructor. In civil engineering, great stress is laid on theory, but the amount of practical training given is very large.

Short accounts of distinguished engineers and architects who are graduates of the University are given below:

W. C. Whitner graduated as an engineer in 1885 and commenced independent practice at once. Some of his work has been the developing of the water power at Portman Shoals, near Anderson; the Catawba River, near Rock Hill; the Chattahoochee River, near Columbus, Ga., and several other water powers in the State of Virginia. He is now chief engineer of the Virginia Passenger and Power Co., with headquarters at Richmond.

S. D. Dunn graduated in the same class and went at once into manufacturing. He has been for years general manager of the Southern Cotton Oil Mill at Winnsboro, S. C.

S. R. Pritchard, of the same class, is professor of electrical engineering at V. P. I. of Blacksburg, Va.

H. H. Huggins, of the class of 1886,

PROF. A. C. MOORE.

went at once into general practice as engineer. In 1890 went into the firm of Wilson & Huggins, architects, at Roanoke, Va. Since 1895 he has been practicing alone in Roanoke, and is
